

PBDP-110 V1.100 Firmware Update Release Notes

The following modifications were performed in the process of implementing the PBDP-110 V1.100 firmware release (07.29.2004):

1. New data modules added

- ▶ Modules #3 and #4 were added to support applications that desire more compact input/output data structures and do not require access to all available drive parameters. Refer to sections 9.1 and 9.2 in the User's Manual for details on these new modules.

2. GSD file updated

- ▶ The GSD file was updated to include the two new modules mentioned above. The current revision of the GSD file is REV. 3.

3. VF-nC1 ASD support added

- ▶ ASD connection timing was modified in order to support the VF-nC1 compact drive family.

Refer to the PBDP-110 User's Manual for more information. The most recent version of the User's Manual is included in the V1.100 board support package (BSP), and can also be obtained at <http://www.iccdesigns.com>.
